Summary

PHP/Laravel Backend Developer with 3.5+ years of commercial experience building and maintaining backend systems and internal enterprise applications. Worked on multiple projects across different domains, with hands-on experience across Laravel 9–13 PHP 8.5 and modern PHP development practices. Interested in backend architecture, distributed systems, microservices and infrastructure. Currently focused on deepening expertise in system design, scalable backend architectures, Docker, Kubernetes, Kafka and cloud-native development.

Key Expertise & Domains:- Backend Development: PHP 8.5, Laravel 9–13, OOP- API Development: REST API, WebSockets, Service Integrations- Databases & Search: MySQL, PostgreSQL, MariaDB, Elasticsearch- Caching & Asynchronous Processing: Redis, Queues, Laravel Horizon, Background Jobs- Authentication & Authorization- Real-Time Systems: WebSockets- Storage: S3 / MinIO- Testing: PHPUnit, Pest, Feature Testing- Infrastructure: Docker, Docker Compose- Code Quality: Code Review, Debugging, Refactoring- CI/CD & Version Control: Git, GitHub Actions / GitLab CI/CD- Database Optimization: Query Optimization- Frontend Integration: JavaScript, TypeScript, Vue.js- Messaging & Streaming: Kafka- Reporting & Analytics- Monitoring & Observability: Sentry, Laravel Telescope, Laravel Pulse

Currently Learning:- Microservices Architecture- Distributed Systems- K8s- gRPC- Event-Driven Architecture- Cloud-Native Development- System Design- ClickHouse

Experience

TTK

1 year 10 months

Middle PHP developer

May 2025 - Present (1 year 5 months)

Russia

Developing and maintaining multiple production products, including a customer support and telephony system, customer database, knowledge base, and real-time communication services.

Tech stack: PHP 8.3–8.5, Laravel 12–13, PostgreSQL, MySQL, MariaDB, Redis, WebSockets, Laravel Broadcasting, Echo, Horizon, Telescope, Pulse, Sentry, Elasticsearch, Docker, Swagger, S3/MinIO, Vue 2–3 (Quasar, Pinia, Vuex, Tailwind).

- Develop and maintain key components of customer support and telephony systems, including inbound and outbound request processing, routing, and data exchange between services.
- Developed functionality for a large-scale customer database in PostgreSQL, including search, filtering, data retrieval, and processing.
- Optimized complex SQL queries and database indexes using EXPLAIN ANALYZE.
- Implemented real-time chats and notification systems for communication between customers and support operators using WebSockets, Laravel Broadcasting, and Echo.
- Developed a system for generating and processing large-volume reports.
- Implemented integrations with external services and S3-compatible object storage using MinIO.
- Covered key business logic with Unit and Feature tests using PHPUnit and Pest.
- Refactored legacy code by extracting shared logic, simplifying existing modules, and improving overall code structure.

Junior PHP Developer

December 2024 - May 2025 (6 months)

Russia

Developed and maintained the backend of a knowledge base platform for a customer support service.

Tech stack: PHP 8.2–8.3, Laravel 10–11, PostgreSQL, MariaDB, Redis, Horizon, Telescope, Sentry, Docker, Swagger, Vue 2.

- Developed new features and maintained existing knowledge base modules, including the PHP/Laravel-based admin panel.
- Implemented change history, charts, and employee assessment tests based on project requirements.

- Developed report generation and export functionality using FastExcel.
- Worked with PostgreSQL and MariaDB, writing SQL queries and performing data retrieval and processing.
- Wrote Unit and Feature tests using PHPUnit and Pest

Educational Center

PHP Developer

February 2022 - October 2023 (1 year 9 months)

Rostov

Developed and maintained an internal platform for processing customer inquiries from Web, Telegram, and WhatsApp.

Tech stack: Laravel 9/10, PHP, MySQL, Redis, WebSockets, Horizon, Docker, Git, Jira.

- Developed backend logic for processing customer inquiries and chats, including receiving and sending messages through Telegram Bot API and WhatsApp Business API.
- Developed REST APIs and integrations with external services.
- Implemented real-time messaging between support operators and customers using WebSockets.
- Implemented authentication, role-based access control, and administrative panel functionality.
- Optimized SQL queries and implemented storage for conversation history and customer inquiry data.
- Fixed bugs and developed new functionality for the existing platform.

Worked in a team consisting of 2 backend developers, a UI/UX designer, and a QA engineer.

Education

Moscow Technical University of Communications and Informatics (MTUCI)

Baccalauréat, Artificial intelligence and machine learning · (August 2023 - July 2029)

College of Radio Electronics, Information, and Industrial Technologies

Secondary vocational education, Programming in computer applications · (September 2019 - July 2023)
